

# SCA Probe Model 50 & 250 Adapter Arm for Signatone Micropositioners

## Document Overview:

The purpose of this document is to provide a brief description of the Adapter arm used to mount the APT Probe Model SCA-50 & SCA-250 onto the Signatone Micropositioner Mounting-block

## Function of the SCA-Adapter:

The SCA-Adapter Arm has 2 functions, one functions is to accommodate the oversized mounting post of the SCA probe that is larger than the standard hole in the Signatone micropositioner probe-mount block.

The Second function is to extend the position or “reach” of the SCA probe to easily probe in the center of a wafer and be brought in at a low profile
